Collection 2026

When elegance meets rustic nonchalance and cosyness meets La Dolce Vita in a stylish, feel-good atmosphere with a solid practicality — and the choice is yours!

The MY FLOOR Collection 2026 unites elegant design and the authentic look of real wood with the advantages of a top-quality, modern laminate floor. It is tough, low-maintenance and durable. Whether you prefer the primary life in the countryside or the urban elegance of a town house, MY FLOOR has just the floor to make you feel good, without compromise on quality or appearance.

Our decors are original and, in the truest sense of the word, sublime. The different surface structures promise variety. Our decorative imprints create an authentic wood-look which is second to none. All floors from MY FLOOR are extremely durable and have the highest abrasion class rating.

For the sake of the environment, we source our wood from sustainable forests. All of our products are made from natural, renewable raw materials and low-pollution wood-based materials. We keep the manufacturing chain lean and efficient: our energy management is certified and particularly resource-saving.

And now: you can enjoy the new MY FLOOR Collection 2026 and be inspired by our living styles.

Our moisture protections

MOISTURE GUARD

All decors from our Chalet collection have been optimised in order to withstand moisture penetration. The resin-rich pine from Mark Brandenburg forest and special gluing processes ensure significantly reduced swelling of the laminate flooring.

This floor is particularly suitable for children and pets. It can easily forgive a mishap or two and can be easily cleaned with a damp mop. Although designed for improved resistance to water and moisture, it is not waterproof and excessive wetting and standing water should be avoided.

WATERPROOF (in accordance with NALFA)

All decors with the waterproof sign are highly water-repellent and resistant to all types of liquid – whether it's oil, paint or water. That's why our waterproof floors are extremely durable.

This floor is particularly suitable for children and pets. It can easily forgive a mishap or two and can be easily cleaned with a damp mop.

Suitable for rooms with high humidity.

Not suitable for outdoor areas, rooms with permanently high moisture load, e.g. shower cubicles, saunas and rooms with floor drains.

And without compromise to the environment!

MY FLOOR has made a voluntary commitment to full transparency. This means that we take the environmental sustainability of our products as seriously as maintaining the highest standards of quality and giving outstanding value for money.

Our environmental policies focus on ecological efficiency — for the whole life cycle of any given product that leaves our factory. We process certified raw materials sourced from sustainably managed forests and check the environmental impact of every stage of production. We produce high-quality and very long-lasting laminate flooring, and also take care of eco-friendly disposal. Our Environmental Product Declaration (EPD) makes information on the environmental credentials of our wood-based products freely available. The EPD is awarded by the Institut Bauen und Umwelt and is an internationally recognised ecolabel in accordance with ISO 14025.

And because we want to keep things this way, we give our staff regular training in awareness and knowledge of environmental matters. We are always striving for better — for you and for our environment. As a result, we are proud to have been awarded Blue Angel environmental certification.

COTTAGE

A glass of wine, a good book, a cosy fire crackling in the fireplace. What more do you need for a peaceful end to the day? The flickering of the fireplace bathes the room in a beautifully warm light. Your new floor from the MY FLOOR Cottage Collection shimmers subtly and its embossed grain is fine and elegant. This will make you long for the evening, every day anew ...

All Cottage Collection floors exude an incomparable sense of comfort and are full of character. An effect that could only be matched by solid wood floors. And, if a small spark jumps out of the fire, it's no problem at all. Our laminate floors are flame-retardant and hard-wearing.

Chalet

Do you love the rustic alpine atmosphere? Up there in the mountains, everything seems just that bit easier and more original. Enjoying a hearty snack after a long hike. Telling stories until late in the evening and even enjoying a vigorous "Schuhplattler". The high-quality floor from the MY FLOOR Chalet collection takes it all in its stride. It is tough, hard wearing and even forgiving of dancing on the parquet, erm — laminate.

The decors of the Chalet Collection also create a rustic ambience in your home. Combine it, for example, with simple wood furniture, linen and leather, or dare to try an atmospheric mix of antique and modern furniture.

Villa

The villa has been perched on the small Tuscan hill for several centuries. It has seen a lot during this time: happy family celebrations, opulent dinners and romantic candlelight dinners. Its style has hardly changed over time — it has always been timelessly elegant. The MY FLOOR Villa Collection combines this classic elegance with understated glamour that effortlessly enhances every room.

Do you value exclusive quality? Allow yourself to be seduced by the noble wood look of the Villa Collection and create your own space with its stylish beauty. And don't forget that it also makes an impressive statement in a business setting.

Residence

Say goodbye to the mundane. You will create an extraordinary ambience with our highlight: urban, stylish and graceful at the same time. Residence is our very special collection, our masterpiece. The extra wide and unusually long panels; the authentic, elegant, natural wood look and the excellent quality of this floor speak all for themselves.

Our MY FLOOR Residence Collection will thrill you. It lies in your room, exuding self-confidence, modernity and exclusivity. You won't just walk across the floor, no, you'll swagger. It goes without saying that the floors are robust, not light-sensitive and comfortable to walk on.

**NEW**

Our decor of the year 2026

Mountain Oak Gold – ML1035

Comfort in its highest perfection: Mountain Oak Gold, our decor of the year 2026, gives even the most coolly furnished living space the warm cosiness that a real home needs today. It gives a room its incomparable character and skilfully enhances its effect – while also being extremely adaptable. Whether in a playful country house or urban Bauhaus style, robust oak always cuts a fine figure. Only solid wood floors can achieve this.

A balanced interplay of warm gold and creamy beige. A finely embossed grain. Natural resin and knot inclusions. Extra-long and extra-wide panels. Mountain Oak Gold is love at first sight, but it is also flame-retardant. This high-quality natural flooring is extremely resistant and durable. So sparks can fly without any worries.

Meets the minimum requirements for collections with abrasion class 33. ✓

Panel construction

The panels for our laminate flooring are made up of at least four sturdy layers. These guarantee the durability and excellent quality of MY FLOOR. This is how we create long-lasting floors for all requirements.

- A** The upper surface of the flooring features a particularly wear-resistant overlay protection film.
- B** The overlay protection film is pressed together with the individual, hardened decorative film to form a hard-wearing surface.
- C** The base layer is a wood fibreboard.
- D** On the underside of the base board, a moisture-resistant stabilisation film ensures the structural stability of the MY FLOOR laminate flooring.

The CLIC system makes laying this floor child's play: with just one finger, panels lock audibly into place. Simply unpack, lay, click and finish — without the least exertion or any additional tools.

- ✓ even easier to lay
- ✓ 50% time saving
- ✓ no hammer, push block or pull bar required
- ✓ safe and robust
- ✓ can be walked on immediately

For more laying tips, we recommend our YouTube videos at ► video.my-floor.com

AC 5/33 A laminate floor's resistance to wear is given as an abrasion class, e.g. AC 5. Here, the number 5 indicates that it will not show signs of abrasion for a considerable length of time. The wear class figure indicates the level of use for which the laminate is suitable. 33 represents heavy commercial use.

Floors with these symbols have the following properties:

All floors use the CLIC system. Simple to lay with no need for a hammer, tapping block and crowbar. Safe and stable, you can walk on them right away.

These panels have a 45° bevelled edge all the way round. Putting them together creates a V-shaped groove, which replicates the character of natural wooden floorboards.

Fast installment thanks to an easy-to-use interlocking system for the long and short sides of the boards.

Decors with this symbol have got a special Moisture Guard.

Decors with this symbol are waterproof (in accordance with NALFA) and suitable for wet rooms.

These panels have a special surface structure.

Decors with this symbol are antistatic.

Outstanding features of all MY FLOOR products:

Low flammability.

Highly resistant to cigarette butts.

Stain-resistant.

Comfortable to walk on.

Easy-care and durable.

Not light-sensitive.

Resistant to wear.

Suitable for use over underfloor heating.

Made from natural, renewable materials.

Hard-wearing and pressure resistant.
